

Product Change Notice (PCN)

To all FASTRON Customers

Date: 11.Oct.2005

Ref no: 3009052

Concerning Part Name: PISM

Product Type: Power Inductor

Classification of Change: Design

Description of Change:

Transition Version --> new clip and base (refer to picture)

REASON for clip: To improve the wire termination robustness and to introduce lead free solder

REASON for base: To match the new clip design

Complete Version --> new ferrite core, non-coated (refer to picture)

REASON: To improve marking permanency and adhesive strength between core and base.

Expected Influence: All electrical parameters remain as per FASTRON specification, however sample testing for approval is recommended only for the complete version.

Product Identification: Letter “F” will be identified on the reel, indicates the Complete Version, marking valid until end of transition period.

Product Availability:

Current version available until week 50/05

Transition version samples available from week 42/05, for mass production until week 12/06

Complete version samples available from week 44/05, for mass production from week 46/05
